About Me

I've spent 10 years building production software, with the last 3 focused on cloud infrastructure and platform engineering. I run production EKS clusters with Karpenter, Linkerd, and Datadog. I've built multi-account AWS architectures and self-service infrastructure tooling that teams actually use. I write RFCs, drive cross-functional decisions, and stay hands-on with Terraform, Kubernetes, and the systems I design. I work well in Java and Python on AWS, and I'm looking for a team building foundational infrastructure at scale.

Work Experience

Alberta Motor Association

SOFTWARE ARCHITECT

Edmonton, Alberta

Jan 2023 - Present

- Deploy and maintain production EKS cluster running Karpenter (autoscaling), Linkerd (service mesh), cert-manager, and Datadog. Manage subnet configurations, IAM policies, and multi-account AWS setup. (Kubernetes, Terraform, Helm)
- Built self-service infrastructure platform from scratch. Engineers provision environments, snapshot databases, and pull production data on demand. Cut provisioning from 2-3 weeks to 2 hours. Adopted by 15 engineers across 3 teams. (Python, Terraform, AWS)
- Led migration from legacy C# monolith to containerized microservices on EKS. Built observability with Datadog (metrics, alerts, dashboards). Improved reliability and environment provisioning speed. (Kubernetes, Docker, Helm)
- Architected multi-account AWS infrastructure for event-driven product processing 2.8M trips with 99.9% uptime. Won 2024 Guidewire Innovation Award. (Lambda, Terraform, Python)
- Drive technical decisions across 12-person team. Write RFCs, set standards adopted by multiple teams. Member of Architecture Steering Committee.

Arterys Inc. (Acquired by Tempus Labs)

SOFTWARE DEVELOPER

Calgary, Alberta (Remote)

Aug 2021 - Aug 2022

- Built backend services for medical imaging SaaS. Services ran AI algorithms and returned results to platform. (Node.js, TypeScript, AWS)
- Fixed performance bottlenecks with Redis caching and AWS tuning. Improved processing turnaround.
- Monitored production via Elasticsearch/Kibana. Caught issues before they affected users.

Alberta Motor Association

SOFTWARE DEVELOPER | SOFTWARE TEAM LEAD

Edmonton, Alberta

Jun 2018 - Feb 2021 | Feb 2021 - Aug 2021

- Designed and built automated test framework from scratch that reduced defects by 30% on subsequent releases. Framework adopted org-wide, still in use 4+ years later. (Java/Gosu, JUnit)
- Led 5-6 person team using TDD. Delivered on time with no critical defects post-launch. Code reviews, mentored junior developers, collaborated with product stakeholders.
- Led Git migration for 12-15 developers. Created Docker image for local dev environments.

Pleasant Solutions

SOFTWARE DEVELOPER

Edmonton, Alberta

Jan 2018 - Jun 2018

- Built HMI for a concrete plant control system using TDD. (C#)

Lockheed Martin Canada

ASSOCIATE SOFTWARE ENGINEER

Halifax, Nova Scotia

Jan 2017 - Jan 2018

- Built Data Fusion module for Combat Management Systems in Java. Combined real-time data streams from multiple sensor sources. (Java, SQL)
- Designed and implemented scenario recorder for capturing and replaying test scenarios, improving debugging and test coverage.

The King's University

SOFTWARE DEVELOPER/RESEARCH ASSISTANT

Edmonton, Alberta

May 2014 - Sep 2016

- Built web application for spatial/temporal data visualization. (JavaScript, PostgreSQL, PHP)

Education

The Open University

MSC. COMPUTING (SOFTWARE ENGINEERING)

Currently pursuing Master's in Computing at The Open University.

Milton Keynes, England (Remote)

May 2024 - Ongoing

Skills

Cloud Infrastructure	Production Kubernetes (EKS) with Karpenter autoscaling, Linkerd service mesh, Datadog observability. Multi-account AWS architectures, Terraform automation, IAM policy design.
Distributed Systems	Build and operate event-driven pipelines and microservices. 99.9% uptime. Experience with real-time data processing (sensor fusion, event streams).
Platform Engineering	Built self-service infrastructure platform (60x provisioning improvement, adopted by 3 teams). Create tooling that makes engineers faster.
Technical Leadership	Write RFCs, drive cross-functional decisions, set standards adopted by multiple teams. Member of Architecture Steering Committee. Led 5-6 person team.

Technologies

Languages	Java, Python, TypeScript, Bash, C#
Kubernetes	EKS, Karpenter, Linkerd, Helm, cert-manager
Cloud	AWS (Lambda, EC2, RDS, S3, SQS, IAM, VPC), Terraform, Docker
Architecture	Distributed Systems, Multi-Account, Event-Driven, Microservices
Observability	Datadog, Elasticsearch, Kibana
Databases	PostgreSQL, Aurora/RDS, Redis
