About Me

10+ years in software, last few focused on DevOps and infrastructure. Build CI/CD pipelines (GitHub Actions, Jenkins), containerize services (Docker, Kubernetes), and automate infrastructure with Terraform. Kubernetes keeps me cloud-flexible. Strong in AWS, monitoring with Datadog/ELK, and Python/Bash tooling. Background in full-stack development means I understand what the teams I support actually need. Looking to grow into a Staff Engineer role.
