About Me

I've spent 10 years shipping production software. The last 3 have been building backend systems on an insurance platform: APIs, event-driven pipelines, and internal tooling. I like owning problems end-to-end. Recent wins include an award-winning pay-as-you-go product (2.8M trips processed, 99.9% uptime) and a developer platform that cut environment setup from weeks to hours. I work well in TypeScript, Python, and Node.js on AWS (Lambda, EKS). I'm looking for a team where I can build things that matter and see the impact quickly.

Work Experience

Alberta Motor Association

SOFTWARE ARCHITECT

Edmonton, Alberta

Jan 2023 - Present

- Architected backend system for pay-as-you-go insurance product: multi-account AWS, external partner integration, billing automation. Processes 2.8M trips with 99.9% uptime. Won 2024 Guidewire Innovation Award. (TypeScript, Python, Lambda, Terraform)
- Own 4 REST APIs serving 5 internal teams and external partners. Design contracts, versioning strategies, and integration patterns. (TypeScript, Python, OpenAPI)
- Built internal developer platform from scratch. Engineers self-serve environment creation, database snapshots, and pull-from-prod workflows. Cut provisioning from 2-3 weeks to 2 hours. (Python, Terraform, AWS)
- Led migration from legacy C# monolith to containerized microservices on EKS. Built observability with Datadog (metrics, alerts, dashboards). (Kubernetes, Docker, Helm)
- Drive technical decisions across 12-person team on \$300M+ ARR insurance platform. Write RFCs, set API and error handling standards adopted by multiple teams.

Arterys Inc. (Acquired by Tempus Labs)

SOFTWARE DEVELOPER

Calgary, Alberta (Remote)

Aug 2021 - Aug 2022

- Built backend services for medical imaging SaaS. Services ran AI algorithms and returned results to platform. (Node.js, TypeScript, AWS)
- Fixed performance bottlenecks with Redis caching and AWS tuning. Improved processing turnaround.
- Monitored production via Elasticsearch/Kibana. Caught issues before they affected users.

Alberta Motor Association

SOFTWARE DEVELOPER | SOFTWARE TEAM LEAD

Edmonton, Alberta

Jun 2018 - Feb 2021 | Feb 2021 - Aug 2021

- Designed and built automated test framework from scratch that reduced defects by 30% on subsequent releases. Framework adopted org-wide, still in use 4+ years later. (Java/Gosu, JUnit)
- Led 5-6 person team using TDD. Delivered on time with no critical defects post-launch. Code reviews, mentored junior developers, collaborated with product stakeholders.
- Led Git migration for 12-15 developers. Created Docker image for local dev environments.

Pleasant Solutions

SOFTWARE DEVELOPER

Edmonton, Alberta

Jan 2018 - Jun 2018

- Built HMI for a concrete plant control system using TDD. (C#)

Lockheed Martin Canada

SOFTWARE ENGINEER ASSOCIATE

Halifax, Nova Scotia

Jan 2017 - Jan 2018

- Contributed to Data Fusion module for Combat Management Systems, combining real-time data streams from multiple sensor sources. (Java, SQL)
- Designed and implemented scenario recorder system for capturing and replaying test scenarios, improving debugging and test coverage.

The King's University

SOFTWARE DEVELOPER/RESEARCH ASSISTANT

Edmonton, Alberta

May 2014 - Sep 2016

- Built web application for spatial/temporal data visualization. (JavaScript, PostgreSQL, PHP)

Education

The Open University

MSC. COMPUTING (SOFTWARE ENGINEERING)

Currently pursuing Master's in Computing at The Open University.

Milton Keynes, England (Remote)

May 2024 - Ongoing

Skills

Backend Systems

Build and operate production systems: event-driven pipelines, REST APIs, microservices on Kubernetes. Multi-account AWS architectures. 99.9% uptime with Datadog observability.

Ownership

Take problems from idea to production. Built developer platform solo (60x provisioning improvement). Own 4 APIs end-to-end. Write RFCs, set standards, debug production issues.

Technical Leadership

Set API and error handling standards adopted by multiple teams. Mentor through pairing, code reviews, design feedback. Led 5-6 person team using TDD.

Developer Tooling

Build tools that make teams faster. Created platform for self-serve environment provisioning (adopted by 3 teams). Test framework still in use 4+ years later.

Technologies

Languages

Python, TypeScript, Java, Bash, C#

Cloud & Infrastructure

AWS (Lambda, EKS, EC2, RDS, S3, SQS, IAM), Kubernetes, Docker, Terraform, Helm

Architecture

Distributed Systems, Multi-Account/Multi-Tenant, Event-Driven, Microservices, REST APIs

Observability

Datadog, Elasticsearch, Kibana

Databases

PostgreSQL, Aurora/RDS, Redis
