About Me

I've been building software for about 10 years, mostly backend systems and APIs. My recent work has been designing cloud architectures, building REST APIs that other teams integrate with, and improving system performance where it matters. I write a lot of Python and TypeScript, and I'm comfortable with PostgreSQL, Redis, and AWS. I like working on systems where the problems are hard and the data is interesting. I'm looking to grow into more complex backend work, ideally in a space where performance and reliability really matter.

Work Experience

Alberta Motor Association

Edmonton, Alberta

SOFTWARE ARCHITECT

Jan 2023 - Present

- Designed and built REST APIs for insurance platform that 4 downstream teams integrate with. Own the API contracts and versioning. (Python, TypeScript, OpenAPI)
- Designed cloud architecture for pay-as-you-go insurance product across multiple AWS accounts and external partners. 1400+ policies sold in first 4 months. (AWS, Terraform)
- Built backend services for automated phone payment system, coordinating between internal teams and external payment providers.
- Rewrote legacy document generation system into containerized microservices. Added monitoring and alerting. (Python, Docker, Kubernetes, Datadog)
- Built CLI tooling for environment and database provisioning. Cut setup time from hours to minutes. (Python, AWS, Terraform)
- Set coding standards for 12-person team. Run technical reviews for cross-team projects.

Vinted

Berlin, Germany

SOFTWARE DEVELOPER

Sept 2022 - Dec 2022

- Worked on shipping platform microservices for multi-carrier integration. Deployed on Kubernetes. (Ruby on Rails, Kubernetes, Docker)
- Wrote automated tests for the carrier integrations.

Arterys Inc. (Acquired by Tempus Labs)

Calgary, Alberta (Remote)

SOFTWARE DEVELOPER

Aug 2021 - Aug 2022

- Worked on backend services that ran medical AI algorithms and returned results to the platform. (TypeScript, Node.js)
- Improved processing turnaround time with Redis caching and infrastructure changes. (AWS, Redis)
- Monitored production systems and logs; caught issues before they reached customers. (Elasticsearch, Kibana)

Alberta Motor Association

Edmonton, Alberta

SOFTWARE DEVELOPER | SOFTWARE TEAM LEAD

Jun 2018 - Feb 2021 | Feb 2021 - Aug 2021

- Built automated test framework that's now used org-wide. Projects that adopted it saw 30% fewer defects.
- Migrated the team from SVN to Git. Created Docker image for local dev environments. (Git, Docker)
- Ran TDD training sessions for the team.
- Led 6-person team. Lots of code reviews and pairing.
- Scoped cloud migration effort and architecture modernization.

Pleasant Solutions

Edmonton, Alberta

SOFTWARE DEVELOPER

Jan 2018 - Jun 2018

- Built HMI for a concrete plant control system using TDD. (C#)

Lockheed Martin Canada

Halifax, Nova Scotia

SOFTWARE ENGINEER ASSOCIATE

Jan 2017 - Jan 2018

- Built Data Fusion module for Combat Management Systems, combining data from multiple sensor sources into a unified view. (Java, SQL)
- Worked with real-time data streams from underwater sensors. (Java)

The King's University

Edmonton, Alberta

SOFTWARE DEVELOPER/RESEARCH ASSISTANT

May 2014 - Sep 2016

- Built web app for spatial/temporal data visualization (Edmonton River Atlas). (PHP, JavaScript, PostgreSQL, PostGIS)
- Wrote undergrad thesis on spatial-temporal referencing methods.

Education

The Open University

MSC. COMPUTING (SOFTWARE ENGINEERING)

Currently pursuing Master's in Computing at The Open University.

Milton Keynes, England (Remote)

May 2024 - Ongoing

The King's University

B.S. IN COMPUTER SCIENCE

Edmonton, Alberta

Sep 2012 - Dec 2016

Projects

Stock Guesser

Side project that pulls news articles and stock data nightly, runs sentiment analysis, and trains a neural network to predict next-day price movement. Built the backend with Python and FastAPI, deployed on local K8s cluster. Cronjobs are built out to run data collection and training daily and daily training runs.

Technologies

Languages Python, TypeScript, Java, Bash

Backend REST APIs, OpenAPI, Microservices, CI/CD

Databases PostgreSQL, SQL, Redis

Infrastructure AWS, Docker, Kubernetes, Terraform

Observability Datadog, Elasticsearch, Kibana
